

Our geography focus this half term is International Trade where we will be linking our history learning to the Silk Road trade route. We will explore trade including Fair Trade, and the role different countries play in providing us with goods. We will map climate across the world and the impact of trade on peoples lives.

In mathematician's we will be learning about fractions, decimals and percentages. We will be learning what a fraction, decimal and percentages means when representing part of a whole as well as adding, subtracting, multiplying, dividing and converting them to solve problems. We are going to be very busy!

In English, we will be reading the book 'A Christmas Carol' by Charles Dickens. This classical text will allow us to explore the different characters in the story and the roles they play. We will be creating a character description and then follow this by writing a persuasive letter to Scrooge.

Wish us luck!

As Scientists we will be learning about evolution and inheritance. We will begin by discussing what inheritance means and what characteristics we inherit from parents and what animals inherit too. We will then explore how animals and plants have evolved over time to suit their habitats. This will be great fun!

Our Computing unit will teach us all about webpage creation.

In PHSE & RE we will be learning about Christianity and Christmas as well as celebrating difference which will include an anti-bullying focus too.

In Design and Technology we are hoping to explore and create a woven scarf inspired by Islamic Silk Road trade.
